# A PERFECTLY INTEGRATED SOFTWARE PLATFORM

With Promotal MedConnect solutions, you can bring a point of care anywhere, whether it's a rural clinic you want to open/ enhance, or through home visits.

Thanks to medical equipment, the doctors/ health organization, can bring quality care to the patient more easily.

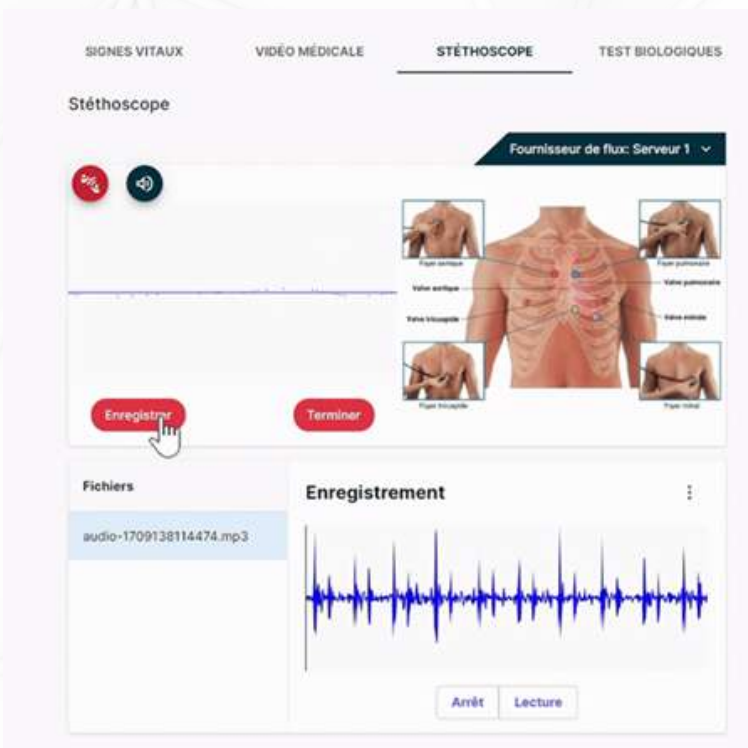

This allows Promotal MedConnect to fit for multiple uses such as General practitioners, Point of care testing, Specialized clinics...

Doctor can see the nurse using the equipment while receiving data from the equipment.

Doctor has access to produce documents, can add annotations, record, screenshot the data...

Doctor has access to patient information from previous examinations.

Audio (Stethoscope) Module

Video (Ultrasound, Otoscope...) Module

# SOFTWARE & AI FEATURES

## October 2025 Update :

- **Offline Mode:** Users can create patients and local consultations in offline mode, gather information, use medical devices, and sync data with the cloud once they are back online.
- **Android and iOS App:** We have ported the Promotal MedConnect web application to iOS and Android for mobile and tablet use.
- **DICOM Web Viewer:** View DICOM files directly within the software.

## AI FEATURES :

### • Smart AI Scribe:

Automatically transcribe both video and in-person consultations with our intelligent AI scribe.

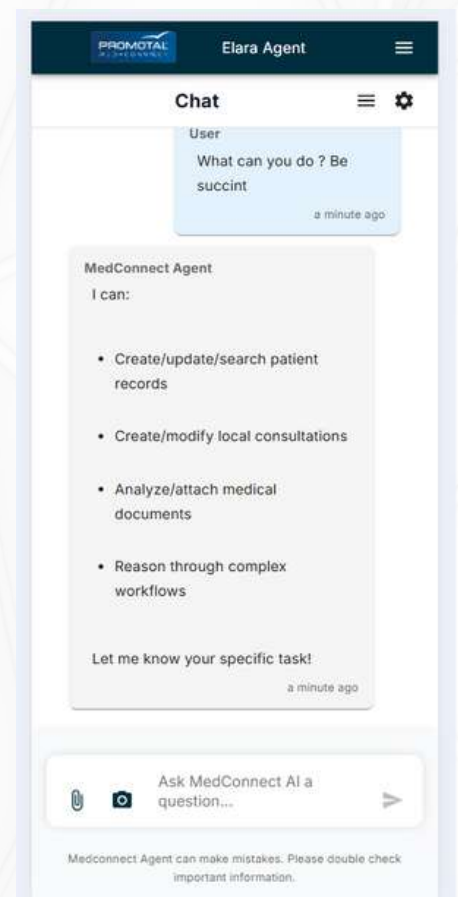

Create custom report templates to fit your workflow, and let the system generate complete, exportable consultation reports in seconds.

### • Meet Elara – Your Integrated AI Assistant:

Elara is your built-in, conversational AI — think of it as ChatGPT seamlessly integrated into the platform.

Elara not only answers your questions but also takes action: it can search for patient data to provide context, draft medical documents, create patients or consultations, read and OCR biological reports, and even scan ID cards for faster onboarding.

## Our chat interface for ELARA Agent.

# MEDCONNECT 360° ADVANCED DEVICES

## TELERADIOLOGY

### PRODUCTS ADVANTAGES

- 1 Expanded Clinical Coverage**  
All parts of human body including adult chest, pelvis, abdomen, hands, feet and head  
Setp up time under 1 minute
- 2 Minimized Radiation Exposure/Reduce Time**  
Low dose product design and mechanism minimized radiation exposure for operators and patients  
Image acquisition under 3 seconds
- 3 Superior Quality X-ray Image**  
70 kV : Improve image penetration  
>Improved bone identification  
6mA : Reduce requires irradiation time  
>Reduces motion blurring  
0.4 mm Focal Spot > High resolution

### Portable X RAY camera

- High Resolution
- Light Weight
- Low Dose
- Wireless Smart Control

## CARDIOLOGY

### USB MIR Spirometer

### PRODUCTS ADVANTAGES

- 1 Clinical accuracy**
- 2 Simplicity of use**
- 3 Compactness**

### Ultrasound scanners EDAN

### PRODUCTS ADVANTAGES

- 1 High resolution and visibility**
- 2 Intuitive operation**
- 3 Portability and durability**

# OPEN A PROFITABLE TELEMEDICINE CLINIC THAT BRINGS SPECIALIST CARE TO UNDERSERVED AREAS

## Why Choose Promotal MedConnect?

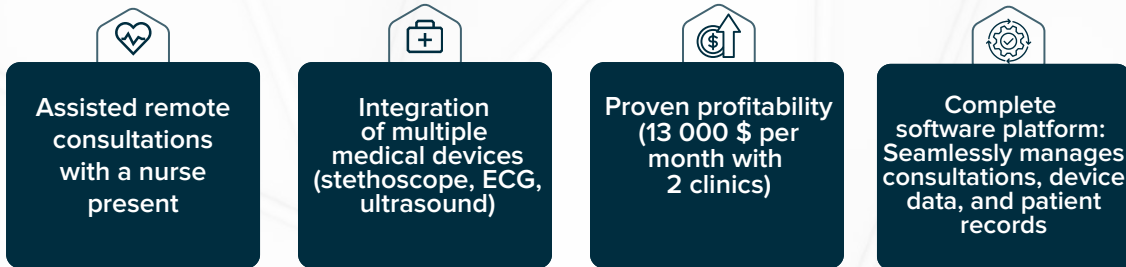

Many communities struggle with limited access to both primary and specialist care, leading to fragmented patient journeys and long wait times.

### Our Solution

Promotal MedConnect offers a unique telemedicine model that supports the complete patient journey, from initial general consultations to specialist follow-ups, all in one clinic.

### Key Features

### How It Works

- 1 Patients visit local Promotal MedConnect clinics staffed by trained nurses
- 2 Nurses conduct initial assessments using our advanced medical devices
- 3 Patients connect with general practitioners via high-definition video conferencing for primary care
- 4 If needed, specialists can be brought into the consultation immediately or scheduled for follow-up
- 5 Nurses assist during all consultations, operating connected devices as directed by the remote doctors
- 6 Doctors diagnose and create treatment plans in real-time
- 7 Nurses perform any necessary follow-up tests on-site

## Case study

### CUBESANTÉ & Promotal MedConnect : Bringing Healthcare Closer to Everyone

CUBESANTÉ is redefining access to healthcare in France through assisted teleconsultation, offering an immediate connection between patients and doctors—whether in urban centers or the most remote rural areas.

With the Promotal MedConnect portable telemedicine kit, trained nurses perform comprehensive check-ups wherever they're needed—at home, in care centers, or within local medical hubs. Each kit includes state-of-the-art connected devices such as digital stethoscopes, dermatoscopes, and vital signs monitors, ensuring accurate and reliable examinations.

Doctors then carry out real-time teleconsultations through MedConnect's user-friendly platform, instantly delivering diagnoses, prescriptions, and medical certificates.

Available 7 days a week, from 8 a.m. to midnight, CUBESANTÉ provides fast, non-emergency care without the need for appointments.

Promotal Medconnect integrated with french billing software to ensure simplified billing and full reimbursement for patients

Up to 50% faster consultations, thanks to seamless equipment integration.

By partnering with Promotal MedConnect, CUBESANTÉ has accelerated its national growth—opening new centers, ensuring secure and HIPAA-compliant data handling, and maintaining CE-certified quality and interoperability across all systems.

Together, we are bridging healthcare gaps, improving patient experience, and empowering medical professionals—bringing reliable, high-quality care closer to everyone, everywhere.
